EMPOWERING THROUGH EDUCATION

“EMPOWERING FUTURES: HIVISION  
FOUNDATION'S PLEDGE TO EDUCATE 10,000  
CHILDREN BY 2035”

In the vibrant city of Hyderabad, where the blend of tradition and innovation is palpable, a collective of five compassionate individuals has united under the banner of Hivision Foundation to tackle a pressing issue in our nation - the dropout crisis among secondary and higher secondary school-age children. A staggering 47 million children in India, as reported by the UNESCO Institute for Statistics and Global Education Monitoring, face limited opportunities due to the discontinuation of their education. Hivision Foundation emerges as a beacon of hope, armed with a firm commitment to empower and support 10,000 children by 2035, thereby making a substantial impact on the educational landscape.

Established in 2022, Hivision Foundation bears the imprint of its founders, each bringing unique expertise to the cause. Ms. Laila Khan, a seasoned professional with two decades of entrepreneurial prowess in the Beauty and Fashion Industries; Mr. Aslam Hirani, the visionary behind Hivision Developers, Hivision Hotels, Hivision Foods, and Co-founder of Green Panther Properties; Dr. P. A. Jiwani, a Consultant and Interventional Cardiologist with over three decades of practice; Ms. Poonam Yarlagadda, Founder Director of Ascent Consulting Abroad Studies & Student Counsellor with more than two decades of experience; and Mr. V. Ganesh, a Chartered Accountant and Senior Auditor practicing for more than three decades. Guided by these socially conscious individuals, Hivision Foundation acknowledges the immediate need to bridge the educational gap.

The stark reality is illuminated by statistics: while the enrollment rate in Class 10 reaches 77%, it plunges significantly to 52% in Class 11. This numerical disparity is not merely a challenge; it serves as a gateway to socio-economic problems that reverberate through generations. Hivision Foundation, recognizing this, stands resolute in its commitment to creating a meaningful impact on the lives of children. It is not just an NGO but a transformative force in the educational narrative of India.

Dedicated to fostering comprehensive growth and development, Hivision Foundation directs its efforts towards economically underprivileged students who have achieved a minimum of 70% in their Class 10 exams, belonging to families with a monthly income below ₹25,000. The foundation extends financial assistance in conjunction with four annual training sessions, molding well-rounded individuals equipped to navigate the competitive world.

In a distinctive approach, students benefiting from Hivision Foundation's support are not only recipients but contributors to a cycle of empowerment. They are encouraged to pay it forward by mentoring and supporting three potential students once they attain their career goals. This ripple effect forms a sustainable model of empowerment.

Laila Khan with HF Students

The positive impact is palpable, evident in the lives of 45 children influenced during the 2022-23 academic year. Surpassing expectations, the foundation empowered 206 children in the forecasted period of 2023-24. Looking forward, Hivision Foundation aspires to reach 400 and 550 children in the upcoming two academic years, with the ultimate goal of impacting 10,000 children by 2035.

Acknowledging the harsh reality that financial constraints pose a significant barrier to education in India, Hivision Foundation issues a compelling call for action. Individuals and corporations are urged to support this initiative, recognizing their pivotal role in shaping the future of India. The underlying belief is simple yet profound: a nation can only progress when its youth is educated, aware, and empowered. Hivision Foundation extends an invitation to all to be part of this transformative journey. Your support is not merely a donation; it is an investment in breaking the chains of limited access to education.
